Dear Participant,

Welcome to the 13th Charles Rodolphe Brupbacher Symposium. During the coming two and a half days, you will hear talks covering the key topics of cutting-edge cancer research including cancer genomics, cancer signalling and targeted therapy, genomic instability, cancer epigenetics, cancer stem cells, tumour microenvironment and tumour immunity, and cancer therapy.

You will also have the opportunity to discuss the latest developments in cancer research with the authors of more than 200 posters during Wednesday evening's poster session.

On Thursday afternoon, three outstanding scientists who made seminal contributions to two of these important research topics will receive the highly-prestigious Charles Rodolphe Brupbacher Cancer Research Prize 2017. We hope that you will enjoy the symposium and look forward to your active participation and stimulating discussions.
